

Explanation of file names

See the file metadata for further details. The files are compiled in an ARCGIS (version 10) file geodatabase.

File name	Explanation
LSCgas_extent	Area of shale gas prospectivity in the Limestone Coal Formation
LSCoil_extent	Area of shale oil prospectivity in the Limestone Coal Formation
LLGSgas_extent	Area of shale gas prospectivity in the Lower Limestone Formation
LLGSoil_extent	Area of shale oil prospectivity in the Lower Limestone Formation
WLOGas_extent	Area of shale gas prospectivity in the West Lothian Oil-Shale unit
WLOoil_extent	Area of shale oil prospectivity in the West Lothian Oil-Shale unit
GULgas_extent	Area of shale gas prospectivity in the Gullane unit
GULoil_extent	Area of shale oil prospectivity in the Gullane unit
Summary_gas_prospective_area	Summary extent of shale gas prospectivity in all four units studied
Summary_oil_prospective_area	Summary extent of shale oil prospectivity in all four units studied
MVS_AOI_focused	Focused study area
MVS_AOI_scoping	Original study area
bulgs_ft	Depth in feet relative to Ordnance Datum to the base of the Upper Limestone Formation
blsc_ft	Depth in feet relative to Ordnance Datum to the base of the Limestone Coal Formation
bllgs_ft	Depth in feet relative to Ordnance Datum to the base of the Lower Limestone Formation
bwlo_ft	Depth in feet relative to Ordnance Datum to the base of the West Lothian Oil-Shale unit
bgul_ft	Depth in feet relative to Ordnance Datum to the base of the Gullane unit
